Applied Photonics Award 2023: Young talent award for theses in applied photonics announced

Jena (Germany)

Until June 30, students and doctoral candidates can once again apply for the Applied Photonics Award. The young researcher award by the Fraunhofer Institute for Applied Optics and Precision Engineering IOF honors theses that deal with innovative optical technologies for society and industry.

Promoting highly qualified young talent and recognizing new ideas in the field of applied photonics at an early stage - this is the aim of the Applied Photonics Award, the young researcher award by Fraunhofer IOF from Jena, Germany.

Prizes are awarded to a total of three final theses in the categories Bachelor, Master/Diploma and Dissertation. The winners will receive prize money and valuable career contacts in the photonics and optics industry. The prize money is staggered as follows:

Category A:	Best Bachelor's thesis (1,000 €)
Category B:	Best Master's thesis (2,000 €)
Category C:	Best dissertation (3,000 €)

Who can apply?

All bachelor's, master's and diploma theses as well as dissertations (in German or English) that were submitted to a German university or college in 2022 or 2023 and are considered "passed" by the time the application is submitted are eligible.

The field of study is irrelevant: the range of former award winners extends from physics to optometry to horticultural sciences. The decisive factor for the award is that the work deals with innovative and commercially viable optical technologies for sustainable living and economic activity.

Award ceremony at the international Photonics Days Jena

The Applied Photonics Award will be presented in October 2023 at the <u>Photonics Days</u> <u>Jena</u>, an international career and networking event organized by Fraunhofer IOF and the <u>Max Planck School of Photonics</u>. The winners will have the opportunity to present their thesis in front of an expert audience. There will also be the opportunity to net-

work with representatives of high-ranking companies in the optics and photonics industry.

This year, Fraunhofer IOF announces the Applied Photonics Award for the sixth time. But the tradition of the award goes back much longer: in 2018, it replaced the Green Photonics Young Scientist Award, which had been presented by the institute since 2012.

This year's Applied Photonics Award is again being presented with the kind support of the Association of German Engineers (VDI) as well as the companies Active Fiber Systems, JENOPTIK, TRUMPF, and Huawei Technologies.

Applications will be accepted until June 30, 2023 at <u>app@iof.fraunhofer.de</u>. For more information, please visit: <u>https://www.applied-photonics-award.de</u>.

About Fraunhofer IOF

The Fraunhofer Institute for Applied Optics and Precision Engineering IOF in Jena conducts application-oriented research in the field of photonics and develops innovative optical systems for controlling light - from its generation and manipulation to its application. The institute's range of services covers the entire photonic process chain from opto-mechanical and opto-electronic system design to the production of customerspecific solutions and prototypes. At Fraunhofer IOF, more than 400 employees work on the annual research volume of 40 million euros.

The **Fraunhofer-Gesellschaft**, headquartered in Germany, is the world's leading applied research organization. With its focus on developing key technologies that are vital for the future and enabling the commercial exploitation of this work by business and industry, Fraunhofer plays a central role in the innovation process. As a pioneer and catalyst for groundbreaking developments and scientific excellence, Fraunhofer helps shape society now and in the future. Founded in 1949, the Fraunhofer-Gesellschaft currently operates 76 institutes and research institutions throughout Germany. The majority of the organization's 30,000 employees are qualified scientists and engineers, who work with an annual research budget of 2.9 billion euros. Of this sum, 2.5 billion euros is generated through contract research.
